

# NO-CODE/LOW-CODE SOFTWARE DEVELOPMENT COURSE

## COURSE AGENDA:

- Master the power to **create apps and automate processes—without coding** through No-Code/Low-Code training.
- Use 4 no-code tools like **Zapier, n8n, Bubble, and Webflow** to transform ideas into working digital solutions quickly.
- Boost your career or startup potential with **future-ready, creative, and automation-driven skills.**

## ABOUT INSTRUCTOR:

**Shahzad** - Software Fractional Strategy Consultant - 25+ Years Of Experience In Software Industry - With Clients In Across North America And Europe, With Focus On:

- Cloud/SaaS- Software As Service
- Artificial Intelligence & Generative AI & LLM
- No-code/Low-code Software Development

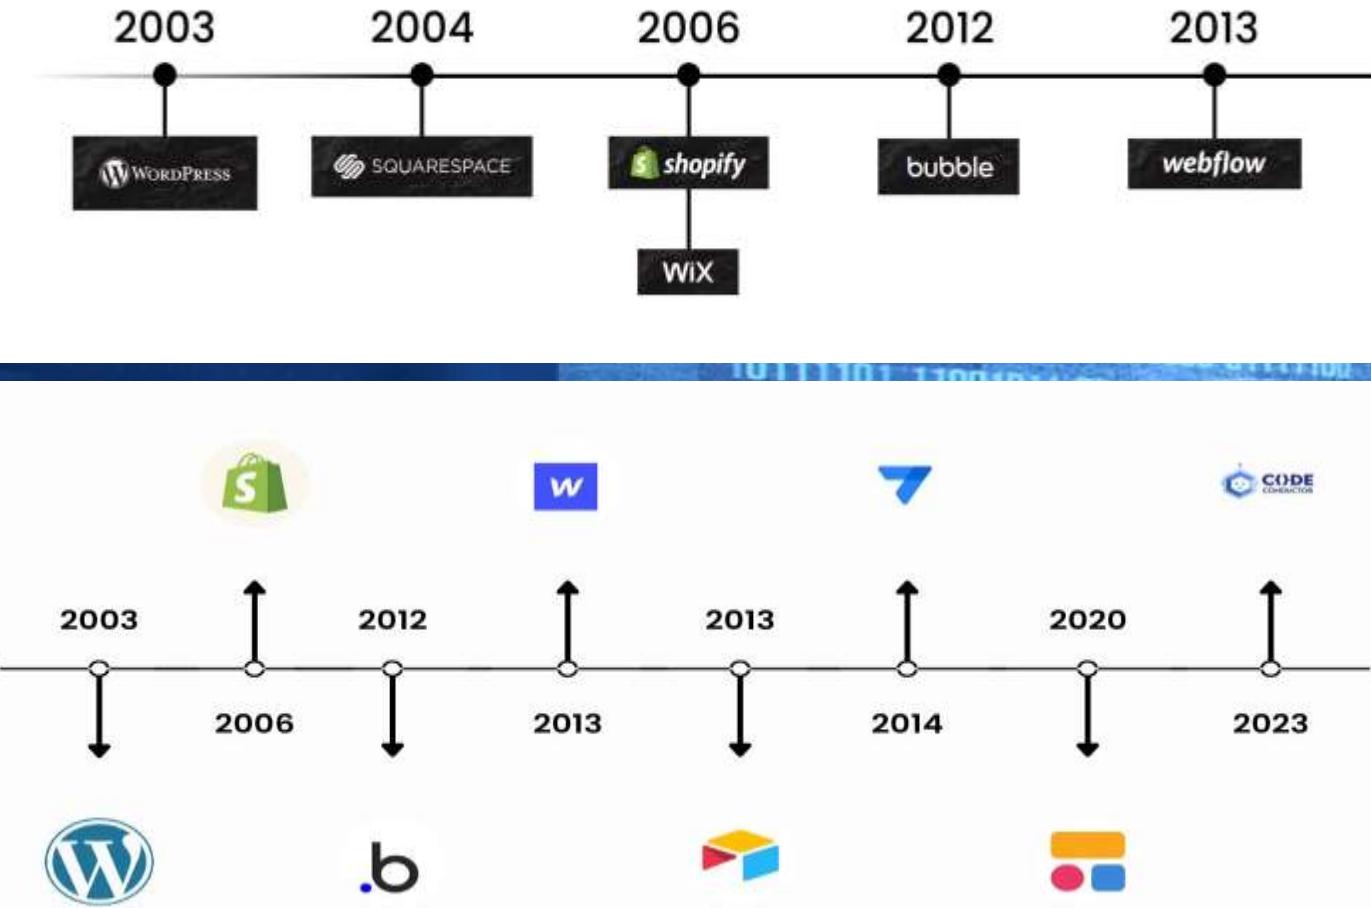

## ABOUT INSTITUTE:

**NexSkill** is Pakistan's leading IT training institute, providing the best IT training in Pakistan. NexSkill offers a variety of professional learning platforms to its students.

<https://www.nexskill.com/>

# NO-CODE - HISTORIC VIEW

In summary, the history of no-code and low-code development reflects a significant evolution in how applications are built, moving from complex coding requirements to accessible, user-friendly platforms that empower a diverse range of users to create and innovate.

## References:

# NO-CODE COMPARATIVE ANALYSIS

## Low-Code/No-Code vs Traditional Software Development

	LOW-CODE/NO-CODE PLATFORMS	TRADITIONAL CODING
DEVELOPMENT SPEED	Faster; drag-and-drop tools and pre-built components	Slower as it requires writing code from scratch
TECHNICAL SKILLS REQ'D	Minimal coding knowledge required	Requires in-depth coding knowledge and experience
CUSTOMIZATION	Limited; based on available templates and tools	Highly customizable as you control the entire codebase
COST	Generally lower due to reduced development time and resources	Higher costs due to time, expertise, and resources required for custom development
FLEXIBILITY	Restricted by platform limitations and vendor lock-in	High: you can use any technology or framework
MAINTENANCE	Easy; vendors provide regular updates/support	Hard; require a dedicated team for bug fixes, updates, maintenance
SECURITY	Managed by platform provider, which may limit control	Full control over security measures, but also full responsibility
INTEGRATIONS	Limited to platform-supported integrations; third-party APIs are easier but may have limitations	Can integrate with virtually any system or API, offering greater flexibility; but requires in-depth knowledge
UPDATES AND ITERATIONS	Quicker iteration cycles due to minimal coding requirements	Slower iteration due to manual coding and testing processes

## Kindly Note:

“Traditional Development”/“Detail Code”, need a lot of energy and mind sensitive logic development personality. Consistent hard work and dedicated commitment, is needed for results in “Detail Code”. Mind alertness and sharpness, level is not same for each resource.

“No-Code”, is not hard core efforts path. It works with light personalities. It make sense for even not so sharp minded resources. It need a different light creative mindset. Even “Aged professional” can continue with “No-Code”/“Low Code” development, as it doesn’t require intense – mind energy and logic development fuel. Let’s start with “No-Code”/“Low Code” course path to achieve professional excellence and business success with agility. Let’s start Now. Thanks.

# WHY – NO-CODE DEVELOPMENT - ADVANTAGES

The fundamental strategic advantage of embracing No-Code Development lies in its unprecedented ability to rapidly accelerate organizational agility by democratizing software creation and drastically lowering the barrier to entry for innovation. By utilizing visual interfaces and drag-and-drop tools, No-Code platforms empower business domain experts—the people who actually understand the process problem—to build and iterate custom applications and automations in hours or days, bypassing the traditional bottlenecks of relying solely on scarce IT or engineering resources. This speed of deployment, coupled with the inherent reduction in long-term maintenance costs and the ability to instantly test and refine Minimum Viable Products (MVPs), makes No-Code a powerful tool for driving bottom-up digital transformation and ensuring the business can pivot quickly in response to market demands.

**Kindly note:** All these product(s) have free tier as well as multiple price based tier. You can launch your professional career or personal business in free tier, when financial viability- is here, you can move to next tier – with more and more features. Remember that, these products as solid client based and service provider partners ecosystem. If a client can pay good for these products, they can pay good for your professional services too. So pay, to earn as multiple times - is , way to go financial model. Remember, you can start with free tier to start with.

# MINDSET FOR SUCCESS IN LC/NC ECOSYSTEM

- Problem-Solving & Analytical Thinking
- Automation-First Mindset
- Integration-Oriented Thinking
- Design and User Experience Sensibility
- Continuous Learning & Adaptability
- Collaboration and Business Understanding
- Creative Innovation

A future-ready No-Code/Low-Code developer is a creative problem solver and business innovator who blends logic, design, and automation to build smart digital solutions. With an automation-first mindset, they streamline workflows, connect systems, and deliver real business value without heavy coding.

Adaptable, curious, and user-focused, they think like builders, innovate like entrepreneurs, and learn like lifelong explorers — shaping the future of technology through simplicity and innovation.

# THE MICROSOFT WAY - NO CODE & LOW CODE

Microsoft Power Platform is a **low-code platform** designed to empower users to create custom business solutions, automate workflows, analyze data, and build websites. It integrates seamlessly with Microsoft services like Azure, Dynamics 365, and Microsoft 365.

## Core Components of Power Platform

**Power Apps:** Enables the creation of custom applications using two approaches: Canvas Apps: Offers complete control over app design and allows integration with various data sources. Model-Driven Apps: Focuses on data-driven applications built on Microsoft Dataverse. Developers can extend functionality using custom UI components, connectors, and APIs.

**Power Automate:** Automates repetitive tasks and orchestrates workflows across services. Cloud Flows: Triggered by events or schedules. Desktop Flows: Automates tasks on desktops or web interfaces. Developers can create custom connectors and use workflow definition functions for complex logic.

**Power BI:** A business analytics tool for creating interactive data visualizations and sharing insights. Developers can embed Power BI into apps or websites and create custom visuals using its SDK.

**Power Pages:** A low-code platform for building secure, external-facing business websites. Developers can extend functionality using custom templates, APIs, and integration with Dataverse.

# ECONOMY CHALLENGES – & THE SOLUTION & THE CONCLUSION

In 2025, Pakistan's economy is showing signs of stabilization and modest recovery, but faces significant challenges including high poverty rates, persistent inflation, and structural issues like high public debt and low human capital investment.

**Inflation:** Inflation is easing, projected to bottom out at 6.0% in FY25, down significantly from 29% in 2023.

**Public Debt:** Public debt remains a concern, with external debt at approximately \$131 billion.

**Poverty and Crime:** High poverty rates persist, with the World Bank noting that 60% of the population is below the poverty line, which is linked to an increasing crime rate.

In 2025, Pakistan faces significant poverty challenges, with the poverty headcount estimated at **44.7%** under the World Bank's updated international threshold of \$4.20 per day. Per Capita Income: Increased to an estimated \$1,824 in FY2025, up 9.7% from the previous year.

[Source: World Bank Group - <https://www.worldbank.org/> ]

## The Solution:

### Market size and growth

2025 - Current value: The **overall IT and software outsourcing market** is valued at approximately \$613.69 billion. 2030 projection: **One forecast predicts the market will reach \$1.06 trillion by 2030**, growing at a CAGR of 8.06% from 2022 to 2030.

## The Conclusion:

The IT and software outsourcing market holds immense potential for economic empowerment, poverty alleviation, and social uplift, especially in developing countries. By enabling global companies to access skilled talent at competitive costs, outsourcing creates high-quality jobs, fuels entrepreneurship, and supports the growth of local digital ecosystems. It allows young professionals to earn globally while living locally, injecting foreign income into communities and strengthening local economies. Outsourcing reduces barriers to entry, empowering individuals from diverse backgrounds — including women, rural youth, and low-income groups — to participate in the global digital economy. As demand for IT services, cloud solutions, AI, automation, and no-code development increases worldwide, the outsourcing industry becomes a powerful engine for upward mobility, skills development, and long-term socio-economic transformation.

# COURSE MONETIZATION - PRODUCTIZED SERVICE OFFERS – TAG LINES - USA & EUROPE MARKETS

## □ Cross-Platform, High-Value Taglines (Zapier + n8n + Bubble + Webflow)

- Automation + Apps + Website = Your Entire Digital System Built Off-Shore.
- “One Partner for No-Code Apps, Automation & Web Presence.”
- “Build Faster. Automate Faster. Grow Faster.”
- “Your Off-Shore No-Code Tech Team for USA & Europe.”
- “From Workflows to Websites — Delivered End-to-End.”
- “No-Code Engineering for Lean, Global Teams.”
- “Scale Your Business Without Scaling Your Costs.”

## □ Zapier – Automation & Integration

- Automate Your Business. Scale Without Hiring.
- Zapier Workflows That Save Hours Every Day.
- Turn Manual Tasks Into Automatic Profits.
- Your On-Demand Zapier Automation Partner.
- Smart Integrations for Fast-Growing US & EU Teams.
- Zapier Systems that Run Your Business While You Sleep.
- Plug, Play, Automate — Zero Engineering Needed.

## □ “n8n” – Advanced Automation & Custom Workflows

- Enterprise-Level Automations Without Enterprise Costs.
- Flexible, Open-Source Automation Designed for Scale.
- Custom n8n Workflows Built for Complex Operations.
- Deep Integrations for Data-Driven Teams.
- Supercharge Your Tech Stack with Visual Automation.
- Automation Powerhouse for USA/EU Tech Companies.

## □ “Bubble.io” – Web App MVPs & SaaS Prototypes

- Build Your SaaS MVP 5x Faster — No Code.
- From Idea to App — Delivered in Days, Not Months.
- Bubble Apps That Look Great and Scale Fast.
- Launch Your Product Without Developers.
- Convert Business Ideas Into Fully Working Applications.
- Bubble.io Development for Founders Who Need Speed.

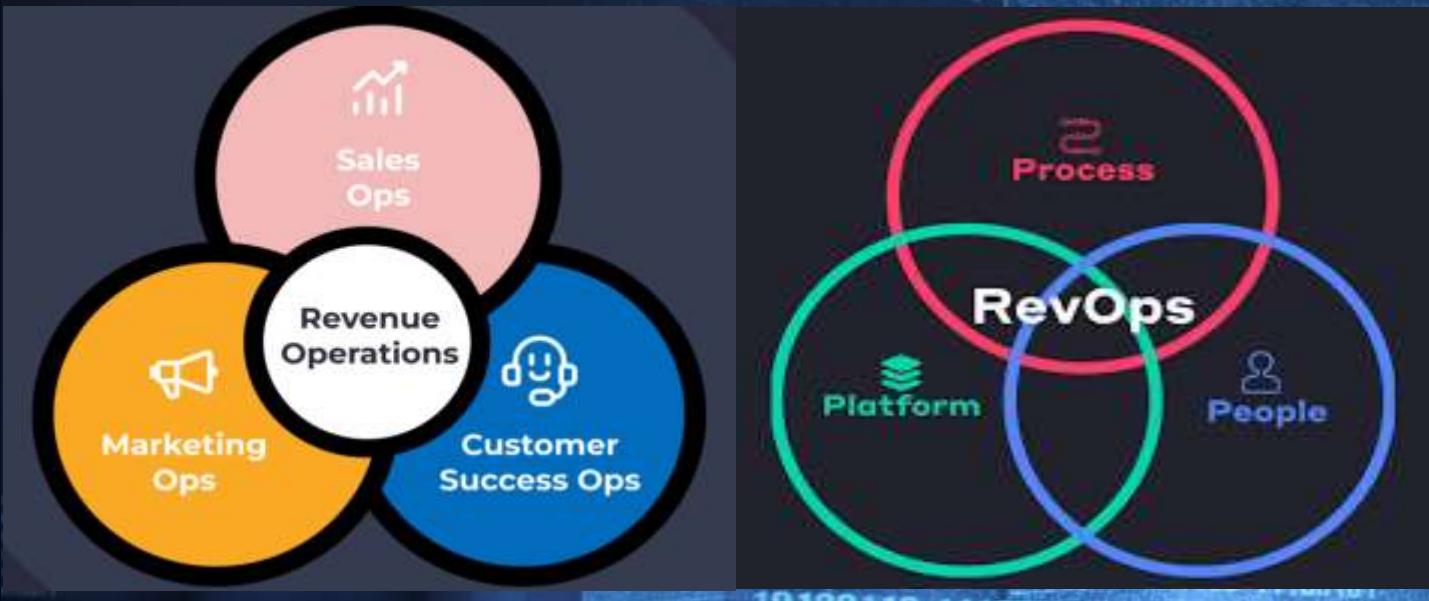

## □ “Webflow” – Websites, Landing Pages & Brand Experiences

- Premium Webflow Websites That Convert Visitors to Clients.
- Design. Develop. Launch — All in Webflow.
- Fast, Beautiful Websites Built for Growth.
- Webflow Sites Built for Speed, SEO & Scale.
- Your Brand, Elevated with Webflow Design.
- Pixel-Perfect, No-Code Websites for US/EU Businesses.
- Modern Web Experiences Without Being a Developer.
- Launch High-Impact Marketing Sites in Days.

# REVENUE OPERATIONS , “REV-OPS” – THE FUTURE

**Revenue Operations (RevOps)** is a strategic business function that aligns and optimizes all revenue-generating activities and departments—specifically marketing, sales, and customer success—to drive efficient and predictable growth.

**RevOps** serves as the central nervous system for a business, aiming to break down traditional departmental silos by unifying processes, data, and technology across the entire customer lifecycle, from initial lead generation to post-sale retention and expansion.

## What - Why in this course?

- ❑ There is no single "no code" for "revenue operations" because revenue operations (RevOps) is a professional function, not a single piece of software. However, many RevOps professionals use low-code or no-code tools to automate workflows and connect different systems, which helps them overcome the limitations of a manually-integrated tech stack, which is often necessary because they aren't typically software engineers themselves. **RevOps is a function, not a product.**

The adoption of a dedicated RevOps function has increased significantly, from 33% of companies in 2020 to 48% in 2024, with predictions that 75% of high-growth companies will adopt this model by 2025. This growth is reflected in the job market, with over 174,000 RevOps job postings found on ZipRecruiter in mid-2024. The revenue operations software market alone was valued at \$3.71 billion in 2023 and is projected to reach \$15.9 billion by 2033, demonstrating substantial investment in the field. Companies with aligned processes and technology due to RevOps have shown significant revenue growth and profitability.

## References:

- <https://www.revenueoperationsalliance.com/what-is-revenue-operations-revops/>

# CAREER OPPORTUNITIES/ROLES/POSITIONS - IN THE NO-CODE / LOW-CODE SPACE - USA & EUROPE MARKETS

## □ Automation & Integration Careers (**Zapier, n8n**)

- **Automation Specialist / Workflow Engineer** – designing business automations for startups and SMEs.
- **App Integration Consultant** – connecting SaaS tools for global clients (CRM, marketing, HR, finance).
- **Operations Automation Manager** – optimizing internal processes for efficiency.
- **Data Pipeline Builder (No-Code)** – connecting apps, syncing platforms, and handling ETL tasks.
- **Freelance Automation Expert for USA & Europe** – offering productized automation services.

## □ Web & App Development Careers (**Bubble.io, Webflow**)

- **No-Code Web App Developer (Bubble)** – building marketplaces, SaaS MVPs, dashboards.
- **Product Prototyper / MVP Builder** – rapid app creation for founders and startups.
- **Webflow Designer / Developer** – building professional websites, landing pages, and brand experiences.
- **Mobile App Creator (No-Code)** – developing apps without coding using modern no-code platforms.
- **Startup Builder / Technical Co-Founder** – providing technical execution using no-code tools.

## □ Business, CRM & Operations (**HubSpot, Airtable, Monday.com**)

- **CRM Implementation Consultant** – setting up HubSpot, Zoho, or Pipedrive systems using no-code.
- **Business Automation Analyst** – mapping business processes and building digital workflows.
- **Airtable/Notion System Architect** – building internal tools, databases, and dashboards.
- **RevOps (Revenue Operations) Specialist** – improving sales, marketing, and support processes with automation.

## □ Design, UX, and Digital Experience (**Webflow, Figma**)

- **No-Code UI/UX Designer** – designing user-friendly web app layouts.
- **CMS & Content Systems Specialist** – building content-rich Webflow sites for global brands.
- **Digital Experience Builder** – creating interactive sites, microsites, and onboarding experiences.

## □ Entrepreneurship, Freelancing, and Off-Shore Services

- **Freelance No-Code Developer** – serving US & EU clients remotely.
- **Creator of Productized Services** – selling ready-made automation/web packages.
- **No-Code Startup Founder** – launching products without needing a technical team.
- **Remote Consultant for SMEs** – providing scalable solutions at low cost.
- **Agency Owner (Automation + Web + Apps)** – building a multi-tool no-code service model.

# NO CODE & LOW CODE – CAREER ORIENTATION

The rise of no-code technology is transforming the way we think about digital creation. No longer is app development or workflow automation limited to traditional coders; no-code platforms empower anyone to build sophisticated digital tools and solutions without needing programming skills.

# NO CODE & LOW CODE – MARKET SHARE SIZE

Current : \$35.61 billion

Future : \$86.55 billion by 2029

- The no-code development platforms market size has grown exponentially in recent years. It will grow from \$28.11 billion in 2024 to \$35.61 billion in 2025 at a compound annual growth rate (CAGR) of 26.7%.
- Expected to grow to \$86.55 billion in 2029 at a compound annual growth rate (CAGR) of 24.9%

# NO-CODE—SOLUTIONS/SERVICES

## [COVERED IN THIS COURSE]

<https://zapier.com/>

**1. Zapier** is a leading no-code AI orchestration platform that allows users to seamlessly connect over 8,000 different web applications to build powerful, custom workflows called "Zaps." It automates repetitive tasks between apps by defining a Trigger (when something happens) and an Action (what the system should do next), enabling non-technical users to save time and scale business processes. Fundamentally, Zapier acts as the central nervous system for your business, ensuring data moves precisely where and when it needs to go, without writing a single line of code.

<https://n8n.io/>

**2. n8n** is a powerful **open-source workflow automation platform** that allows users to connect various services, databases, and APIs to automate complex processes. It distinguishes itself by its **self-hosted capability**, giving users complete **data sovereignty and control**, while offering a graphical, node-based interface for visual programming. Functionally, n8n is designed for **technical users and developers** needing highly customized, private, and scalable backend automation that goes far beyond standard off-the-shelf integration tools.

# NO-CODE—SOLUTIONS/SERVICES

## [COVERED IN THIS COURSE] – PART - 2

<https://bubble.io/>

**3. Bubble.io** is a leading no-code visual programming platform that allows users to design, develop, and launch full-stack web and mobile applications without writing traditional code. It provides a drag-and-drop interface for building responsive front-end designs and a powerful workflow engine for complex back-end logic, database management, and API integrations. The platform serves as a complete development and hosting environment, making it the primary choice for entrepreneurs and non-technical founders to rapidly build, test, and scale their Minimum Viable Products (MVPs) and SaaS applications.

<https://webflow.com>

**4. Webflow.com** is a powerful visual web development platform that allows designers and marketers to create, launch, and host fully custom, responsive websites without needing to write traditional code. It translates visual design choices directly into clean, production-ready HTML, CSS, and JavaScript, offering a level of control typically reserved for expert coders. This blend of design freedom and technical rigor makes it the preferred tool for building high-fidelity marketing sites, portfolios, and blogs, complete with a robust built-in Content Management System (CMS).

# NO-CODE SERVICES COVERED IN COURSE – MARKETPLACE ECOSYSTEM

The screenshot shows a search interface for finding no-code service partners. On the left, there are several dropdown filters: 'Solution Partner Company Size' (Select an option), 'Project Budget' (Select an option), 'Minimum Spend' (Select an option), 'Free Discovery Call' (Select an option), 'Services' (Select an option), 'Service Regions' (Select an option), 'Language' (Select an option), 'Tools Most Commonly Worked With' (Select options), and 'Industries Primarily Served' (Select an option). At the top right, there are logos for Webflow, bubble, n8n, and zapier, with a note 'Available experts only' and a switch set to 'ON'. Below these, there are six cards representing different solution partners:

- flow digital**: Premier Solution Partner. Description: "Zapier will do all the work to match you with the best Solutions Partners". Buttons: "Get matched". Rating: 5.0 (445).
- MercOlogy**: Premier Solution Partner. Description: "Meet our team, your Solutions Partner matchmaker.". Buttons: "Accepting new clients". Rating: 5.0 (424).
- connex digital**: Premier Solution Partner. Description: "Book your 1-1 screenshare session today and Just. Get. It. Done!". Buttons: "Accepting new clients". Rating: 5.0 (445).
- flowmondo**: Premier Solution Partner. Description: "Stuck on a Zap for too long? Get an AI & Automation, Made Easy!". Buttons: "Accepting new clients". Rating: 5.0 (445).
- GetUWired**: Premier Solution Partner. Description: "AI & Automation, Made Easy". Buttons: "Accepting new clients". Rating: 5.0 (445).

## Our Course - Tech companies Partners Ecosystem

## This Course Students Possibilities - Potential Directions:

Types of Opportunities – Two Types of Companies

- End Client Ecosystem [All sectors of industries like Real Estate, Construction, Education, Finance, Insurance, Tourism, Transport, etc.]
- Service Provider Partner Ecosystem. [Rich Software Partners Industry ecosystem]

## ACTION ITEMS - To DO:

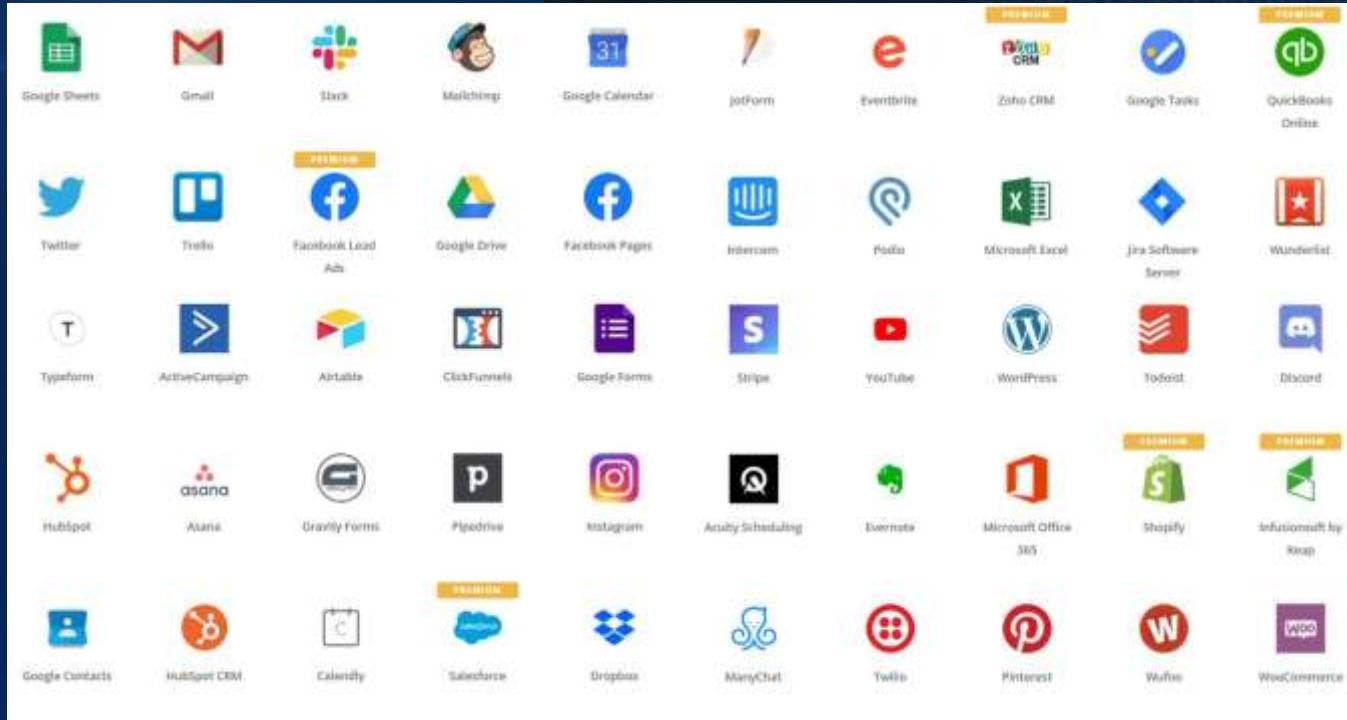

**Explore all partnership ecosystem, study their business model, investigate their financial-clients dynamics, brainstorm about their tech-stack implementation, evolve ideas about your future professional orientation to join these companies, strategize about your business road-map – to launch your company round these ideas, refine thought process.**

# NO-CODE – WEB SITES , APP - CREATION PLUS BUILD – WITH “BUBBLE.IO” & “WEBFLOW”

- Build full-featured web apps visually using Bubble.io, including databases, workflows, user authentication, and dynamic logic—without writing code.
- Design professional, responsive websites with Webflow's visual designer, offering pixel-perfect layout control and built-in SEO tools.
- Launch faster with drag-and-drop components, pre-built templates, and reusable elements across both platforms.
- Integrate APIs, automation, and third-party tools easily to extend functionality and create powerful digital experiences.
- Deploy and scale instantly, allowing entrepreneurs, startups, and students to go from idea to live website or application in days instead of months.

## ACTION ITEMS - To DO:

**Explore all web sites, apps - creation & build possibilities, plan your professional orientation round these paths, strategize about your business road-map – to launch your company round these ideas, refine thought process.**

❑ Zapier connects, 8000+ app(s) Ecosystem.

❑ Explore your-self here:

<https://zapier.com/apps>

ACTION ITEMS - To DO:

Explore all 8000+ app integration possibilities, study their business automations, plan your professional orientation round these paths, strategize about your business road-map – to launch your company round these ideas, refine thought process.

# WHY JOIN - OUR NO-CODE/LOW-CODE TRAINING COURSE

Are you ready to turn your ideas into real projects — without writing a single line of code?

Join our No-Code/Low-Code Training Course and learn how to build professional websites, web apps, and smart automations using powerful tools like Webflow, Bubble, Zapier, and n8n.

Here's why you should join:

- 💡 Learn future-ready skills — No-code and low-code platforms are in high demand worldwide.
- 🌐 Create real projects — Build stunning websites with Webflow and full-function web apps with Bubble.
- ⌚️ Automate your workflows — Use Zapier and n8n to connect apps and save hours of manual work.
- ❓ Boost creativity & independence — Prototype, launch, and scale your own ideas without waiting for developers.
- 📈 Enhance your career opportunities — Whether you're a student, freelancer, or aspiring entrepreneur, these tools give you a competitive edge.

Start building smarter — not harder.

👉 Enroll now and become part of the next generation of digital creators!
