

Complete, structured, practical business roadmap for launching and growing your **Zapier + n8n automation consultancy business**, based directly on the strategy in the previous note.

This roadmap is designed for **90 days** (3 months), because that's the sweet spot for going from *zero* → *first clients* → *consistent revenue*.

📅 90- Day Business Roadmap for a Zapier + n8n Automation Consultancy

📅 Phase 1 — Foundation & Brand Building (Days 1–30)

Goal: Establish a professional presence, validate your direction, and secure your first prospect conversations.

1. Business Definition & Strategy (Days 1–3)

Decide on:

- Your niche (startups, SMBs, agencies, enterprise IT, real estate, e-commerce, etc.)
- Primary positioning:
 - “Automation & Workflow Engineering”
 - “Integration Consulting”
 - “No- Code/Low- Code Automation”
- Your service pillars (choose 3–5):
 - Zapier automation builds
 - n8n workflow engineering
 - n8n self- hosting setup
 - Business process mapping
 - Automation audits
 - Maintenance retainers

Deliverables:

- Clear positioning statement
 - Defined audience
 - 3–5 packaged services
-

2. Branding & Online Presence (Days 4–10)

Actions:

- Choose a brand name (use the previous lists)
- Register domain (.com preferred)
- Create:
 - Logo (simple, minimal)
 - Brand color scheme
 - One- page website (no need for big site)

Your website should include:

- Hero statement (simple promise)
- Services
- Portfolio demos (sample projects)
- Contact form / calendar link
- CTA: *“Get a Free Automation Audit”*

Deliverables:

- Domain + email
 - Website
 - Basic brand identity
-

3. Portfolio Development (Days 11–20)

Create **4–6 automation demos** using Zapier and n8n:

Example demos:

- CRM lead routing automation
- Slack notifications from form submissions
- Email parsing into databases
- Order → invoice automation
- Workflow orchestration in n8n

Trick:

Record short **2- minute explanation videos**.

Deliverables:

- 4–6 portfolio case demos
- Screenshots + diagrams
- Short explainer videos

4. Authority Building (Days 21–30)

Start content creation:

- LinkedIn posts (3–4 per week)
- “Automation tips” threads
- Case study breakdowns
- Before/after workflow value stories

Also:

- Join Zapier + n8n communities
- Join no-code Slack/Discord groups
- Follow relevant hashtags

Deliverables:

- 12–15 content posts
 - Community involvement
 - Growing network of potential clients
-

📌 Phase 2 — Client Acquisition & Delivery (Days 31–60)

Goal: Begin booking calls, create automation audits, and close your first paid clients.

5. Lead Generation & Outreach (Days 31–45)

Start contacting:

- Founders
- Agencies
- SMB operators
- SaaS teams
- Solopreneurs
- Local businesses

Daily habit:

25–50 outreach messages on LinkedIn or email.

Proven outreach template:

“I specialize in Zapier & n8n automation and noticed you're using tools that can save 5–20 hours/week through workflow automation.

Want a free 15- minute audit where I identify 3 workflows you could automate immediately?”

Deliverables:

- 200–500 outreach attempts
 - 10–30 calls booked
 - 3–5 automation audits completed
-

6. Sales Process & First Clients (Days 45–60)

Audit → Solution → Proposal

This is the best conversion funnel for automation services.

Your audit call should:

- Identify 3–7 high- ROI automation opportunities
- Estimate savings
- Show small parts of your portfolio
- Provide a workflow diagram

Your proposal should contain:

- Scope
- Timelines
- Deliverables
- Data flow diagrams
- Pricing
- Maintenance plan

Deliverables:

- 2–5 clients closed
 - Signed agreements
 - Paid 1–3 project invoices
-

7. Delivery & Workflow Engineering (Days 45–60)

Deliver “quick wins” FIRST:

- Build fast

- Show progress early
- Communicate clearly
- Document workflows
- Provide training videos

Deliverables:

- 2–3 quick win workflows deployed
 - Documented processes
 - Happy clients who will refer others
-

📌 Phase 3 — Scaling, Recurring Revenue & System Building (Days 61–90)

Goal: Turn one-off projects into long-term clients and stabilize your business.

8. Create Recurring Monthly Packages (Days 61–70)

High-margin recurring plans:

Examples:

Basic Maintenance – \$300/mo

Small updates, error handling.

Growth Automation – \$750/mo

New workflows every month.

Enterprise Orchestration – \$2,000/mo

100+ pipelines, dev-ops support, self-hosting.

Deliverables:

- 2–3 recurring clients
 - Predictable monthly revenue
-

9. Build Internal Assets (Days 70–80)

Create reusable automation templates:

- CRM workflows
- Email workflows

- Onboarding systems
- Data cleanup scripts
- Lead scoring models
- API integration patterns

Deliverables:

- Template library
 - Reusable backend components
 - Faster delivery → higher profit
-

10. Optimize & Expand (Days 80–90)

Now that you have clients and systems:

Expand your capabilities:

- Add Make.com
- AI + automation pipelines
- API-level integrations
- Specialized niche packages
- Webinar or lead magnet

Decide your growth path:

- Stay solo & premium?
- Build a small team?
- Start an agency?

Deliverables:

- Upgraded service stack
 - Growth direction
 - 90- day review & next quarter plan
-

📋 Summary Roadmap Timeline

Days 1–30: Build Foundations

Branding, website, portfolio, content, presence

Days 31–60: Get Clients

Outreach, audits, sales, deliver your first high- value automations

Days 61–90: Scale
