

Second Phase of Course – Extension of Course

[After completing initial course, this is second phase of course]

Objective:

Equip learners to **design, build, and ship** production-grade automations, websites, and internal tools using Zapier, n8n, Webflow, and Bubble. Prepare learners to **launch a services business/agency**, win clients on **Upwork & Fiverr**, and deliver measurable outcomes. Advance learners from fundamentals to **enterprise-grade architectures**, including scalability, security, and monetization.

Course Content Outline

A) Practical, Industry Practice Projects (product-based & cross-stack)

Zapier (No-Code Automation in SaaS Ecosystems)

- Lead-to-CRM Pipeline: Webflow form → Zapier → HubSpot/Pipedrive + Slack alerts.
- E-commerce Ops: Shopify order → Google Sheets ledger → QuickBooks, track fulfillment.
- Customer Success: NPS survey → Support task creation + segment follow-up emails.
- Capstone: SLA-backed automation with branching (Paths), error handling, and audit logs.

n8n (Open-Source, Self-Hosted Automation & Data Workflows)

- Webhooks + Data Enrichment: Ingest leads → Enrich with Clearbit → Post to database/API.
- ETL Mini-Pipeline: Pull CRM data → transform → push to a centralized warehouse.
- API Orchestration: Periodic sync with retry logic, queues, and alerting via Telegram/Slack.
- Capstone: Dockerized n8n with credentials vault, secrets management, and scaling patterns.

Webflow (Design-to-Production Websites & CMS)

- Marketing Site with CMS Collections + filters; SEO-ready, multilingual structure.
- CMS + Zapier: Auto-publish blog or resources from Airtable/Forms via Zaps.
- E-commerce: Checkout, upsells, inventory basics; transactional automations.
- Capstone: Performance-optimized, accessible (WCAG) site with CMS API + webhooks.

Bubble (No-Code Full-Stack Apps & Internal Tools)

- Internal CRM/Mini-ATS: Roles, permissions, search, reports, email triggers.
- Marketplace MVP: Listings, search, payments, messaging, admin console.
- API Integrations: API Connector to external services; backend workflows + schedulers.

- Capstone: Scalable Bubble app with privacy rules, custom plugin, and observability.

Cross-Stack Capstone (End-to-End System)

- **Webflow front-end** for marketing + lead capture
- **Zapier** for quick automations & notifications
- **n8n** for heavy-duty orchestration/ETL & self-hosted workflows
- **Bubble** for the internal admin tool/dashboard + customer portal
- Production checklist: logging, versioning, SLAs, on-call runbooks, documentation.

B) Incubation Model: Agency Launch & Freelance Business Building

- **Agency Setup**
 - Positioning: Choose verticals (e.g., SaaS, eCommerce, agencies) & productized services.
 - Service Catalogs by Platform: Zapier Audits, n8n Self-Hosting, Webflow CMS builds, Bubble MVPs.
 - Pricing Models: Fixed-scope packages, retainers, T&M + value-based pricing.
- **Operational Foundations**
 - Legal & Compliance basics (contracts, NDAs), project accounting, invoicing, IP clauses.
 - Delivery Playbooks: SOW templates, change orders, acceptance criteria, QA checklists.
 - Tooling Stack: PM (ClickUp/Asana), docs (Notion), repos (Git/Backup strategy), uptime & alerts.
- **Upwork & Fiverr Launch**
 - **Profiles:** ICP-aligned profiles, portfolio structure, credibility boosters (case studies, results).
 - **Proposals:** Outcome-led proposals; Loom demos; template library by use case & platform.
 - **Bidding:** Qualification rubric, fast-discovery scripts, follow-up cadences, objection handling.
 - **Gigs:** Craft high-converting gigs (Zapier audits, Webflow CMS builds, Bubble MVP sprint).
 - **Delivery:** SLAs, communication cadence, handover kits, and upgrade paths (retainers).
- **Assets You'll Get**
 - 10+ proposal templates, 6 SOW templates, risk register, QA checklists, discovery scripts.

C) Sales & Marketing Training (Platform-Specific)

- **ICP & Offers (By Platform)**
 - Zapier: Ops/RevOps efficiency → "24-hour ops automation sprint."

- n8n: Data & integration needs → “Self-hosted, secure orchestration pipelines.”
 - Webflow: Brand + speed-to-market → “Conversion-first CMS site in 2 weeks.”
 - Bubble: Rapid product validation → “MVP in 4–6 weeks with analytics & auth.”
- **Positioning & Messaging**
 - Outcome-based messaging; bundling strategy; proof via demos & mini case studies.
- **Lead Gen & Funnels**
 - Content: teardown videos, before/after demos, LinkedIn/GitHub/YouTube strategy.
 - Outbound: ICP lists, email sequences, discovery call framework, win stories.
- **Sales Execution**
 - Scoping workshops; ROI calculators; live demo playbooks by platform.
 - Negotiation + Objection handling (security, scalability, “no-code limits”).
- **Retention & Expansion**
 - Quarterly business reviews, roadmap co-creation, upsells to retainers and managed services.

D) Advanced Topics (Product-Specific Deep Dives)

Zapier (Advanced)

- Webhooks, Storage, Code by Zapier (JS), Paths, Looping, Error Handling & Retries.
- Zapier CLI for custom integrations; secrets management; rate limits & monitoring.
- Designing idempotent automations; audit trails; multi-environment governance.

n8n (Advanced)

- Docker/Kubernetes deployment, scaling with queues; worker separation.
- Custom node development; credentials vault; environment variables & secrets.
- Telemetry, tracing, and alerting; building resilient, long-running workflows.

Webflow (Advanced)

- CMS API, webhooks; composable content modeling; localization at scale.
- Webflow Logic (where relevant), memberships, e-commerce customizations.
- Lighthouse performance, accessibility (WCAG 2.1), structured data, reverse proxy patterns.

Bubble (Advanced)

- Privacy rules & data security; Dev/Live branching; version control strategy.
- Backend workflows, recursive schedulers, rate limiting & exponential backoff.
- Performance tuning (DB structure, option sets, search strategies), custom plugins.
- API Connector best practices; logging, error boundaries, and observability.

Cross-Cutting Advanced

- Documentation-as-deliverable; runbooks; incident response; SLAs.
- Contracts for automation uptime; KPIs (latency, failure rate, MTTD/MTTR).

Why This Course – Phase 2, Is Important

This Phase 2, course compresses **real-world agency experience** into a practical, portfolio-driven format so you can ship value from week one. You'll learn **four market-leading platforms** in tandem—giving you flexibility to sell outcomes, not tools. We don't stop at tutorials: the **incubation model** takes you from practitioner to **revenue-generating service provider** with repeatable offers. Every module is tied to **deployable assets**—templates, scripts, SOWs, and checklists—so you're client-ready immediately. You'll master **advanced topics** like scaling n8n, enterprise-grade Zapier governance, Webflow performance, and Bubble security. The **capstone** blends all four tools into a production system, showing you how to architect solutions end to end. We emphasize **sales & marketing** so you can reliably find clients, price confidently, and close deals. Whether you want a **career upgrade, freelance income, or a full agency**, this course is your blueprint to real, bankable outcomes. You'll graduate with **case-study quality projects**, a sharpened niche, and the confidence to deliver at a professional standard.
